

GARAGE DOORS & GARAGE SCREENS

SUBMITTING AN APPLICATION

The following items are needed to receive approval to install a new garage door or garage screen:

1. A completed garage doors and screens application with details of work to be completed.
For example, if you are installing a garage screen, include specifications and color of screen.
Applications for a garage screen must include plans to screen all garage doors on the home (ie. a golf cart garage.)
2. Plot plan with proposed modification clearly labeled.
3. Color photo of current view of home with garage and driveway.

Please note, an incomplete application is the number one reason for a delayed response.
